

PAVIR STONE

Special wax for marble

APPLICATIONS

A very special paste wax, **PAVIR STONE** is recommended for any type of marble, granite, agglomerate and natural stone with low, average or high absorbency. It restores the look of the surfaces while waterproofing them; it covers small flaws bringing out the vein of the material without changing the original colour.

Thanks to the hard waxes it contains, **PAVIR STONE** allows to obtain, according to the original polish of the material, a very brilliant shine.

HOW TO USE

Apply a thin coat of the product **PAVIR STONE** to clean and dry surfaces and spread it evenly using a cotton cloth.

Rub in to allow penetration and once surface is dry, polish using a woollen cloth, the single-brush floor machine, or another suitable mechanical polisher. **PAVIR STONE** has excellent nourishing properties with the unique ability to repel dust and humidity.

It protects vanity tops, kitchen tops, tables and window sills with no halo effect.

WARNINGS

Refer to the MSDS available upon request.

PACKAGING

Can of 750 ml. Box of 15 pcs.

HANDLING AND STORAGE

The product must be stored in the original containers, perfectly sealed, at a temperature between 0

and 30°C and shielded from direct sunlight at ventilated area. In these conditions, the product has a self-life of 12 months of the date quoted in the delivery note. If the material has been stored for longer than its recommended self-life, it might still be suitable, but this has to be determined beforehand by performing quality checks on its application-related properties.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect use of the product or inadequate storage. The indications supplied with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package.

For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing.

The reproduction, even partial of this product sheet is forbidden. The data refer to the standards in force at the time of printing, 2020. The company reserves the right to make any changes without notice.
