TECHNICAL DATA SHEET

K-Soap

Let's shine

Water-repellent detergent

CHARACTERISTICS

K-SOAP is a revolutionary concentrated detergent of the latest generation, able to give, after washing of the surface, an immediate and extraordinary water repellence, greatly improving resistance to dirt and water, making cleaning easier and maintaining joints cleaner and more protect.

K-SOAP, even if it's not a water repellent product with anti-rising characteristics, temporarily reproduces these features, with a super water repellence; thanks to its neutral pH it can be used on different kind of surfaces, even the most delicate ones, without damaging them. The product can be used on floorings like natural stones, marbles, granites, concrete, grits, and this make the product unique for its strengthening of barrier against water; furthermore, the product does not create unsightly films, does not change the natural aspect of the surface and does not modify the colour. It can be used both as a ordinary maintainer and as an extraordinary one.

K-SOAP does not require particular rinsing after using; the washed surface is immediately walkable and protected; the product is ideal also after traditional polishing or after using polishing creams as protective rinsing on the stones materials.

K-Soap

1 lt | 5 lt | 25 lt

200 lt

HOW TO USE

PREPARATION OF THE SUPPORT: First impregnation: 1-1.5 lt of product for 10 lt of warm water, according to finishing of the floor and kind of surface.

Manual cleaning: 0.3-1 lt of product for 10 lt of warm water.

Washer-dryer machine or floor cleaning machine: 0.2-0.7 lt of product for 10 lt of water.

Maximum quantity to obtain a very accentuated impregnating effect is a diluition of 1 lt of product into 3 lt of water;

CAUTION: if any evenual oily film will remain on the surface after impregnation or cleaning, it means there is excess of product that can be removed with a further superficial washing with warm water.

APPLICATION: the product can be used manually (with mop or appropriate euipment), with mono-brush machine, washer-dryer machine or floor washing machine putting the product directly into the tank. **K-SOAP** doesn't require special rinsing after use. Please remind that a very shine surface will nedd much less product than the recommended average quantities.

PRECAUTIONS

Protect from frost. The surface may darken efter treatment (normally this happens on non-tretaed absorbent stones like limestone, so we always suggest to make a preliminary tast to verify compatibility of the product with the surface

STORAGE

Product must be stored in the original containers, hermetically closed, at a temperature between 10°C and 30°C, protected from direct sunlight and in ventilated areas. In these condictions the producthas a shelf life of 2 months from the date of the delivery note, if the material will be kept in storage beyond the duration of recommended stability, will not necessarily be considered unusuable but must be performed a preventive check on the product.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect use of the product. The indications supplied with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package.

For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing. The reproduction, even partial of this product sheet is forbidden. The data refer to the standards in force at the time of printing, 2023. The company reserves the right to make any changes without notice.
