

Cement Cleaner

Let's shine

Neutral detergent
for concrete surfaces

CHARACTERISTICS

CEMENT CLEANER is a neutral pH detergent for the ordinary cleaning of concrete floors and other hard surfaces, ideal for removing traces of foot traffic, dust or dirt deposit.

CEMENT CLEANER contains quaternary ammonium salts that give it an excellent sanitizing capacity, at the same time the absence of ammonia / caustic soda or acid pH substances allow to use this detergent on any type of surface that has protective aesthetic treatments and finishes such as polished concrete, Palladian and natural stones like marble and granite. Thanks to its high concentration and to its cleaning and sanitizing capacity.

CEMENT CLEANER is an ideal product for cleaning food shops, offices, banks, shopping centres, warehouses, distribution centres, food processing plants (such as cold rooms or bottling plants) and production areas.

CEMENT CLEANER eliminates dirt and sanitizes by acting deeply without leaving residues or white streaks. Suitable for the application of HACCP self-controls plans.

HOW TO USE

PREPARATION OF THE SUPPORT: vacuum or previously remove dirt, sand, machining shavings or any other type of solid residues.

PREPARATION OF THE PRODUCT: the product is used diluted in variable proportions considering the type of dirt to be removed. For maintenance cleaning of floors, dilute the product at a concentration of 1 to 5% (10-50 ml per litre of water).

APPLICATION: the product has low foam, if used correctly it does not need to be rinsed.

Cement Cleaner

5 kg | 25 kg

In case of excessive dosage the floor may be sticky, in these case it is advisable to rinse with water. Once the surface cleaning cycle has been completed, it is advisable to rinse the equipment with clean water.

ATTENTION

It is recommended to perform a test on a small part of the floor to be treated to verify the suitability of the application and that the results are desired. Allow the surface to dry before carrying out the checks and proceeding with the application.

STORAGE

The product must be stored in the original containers, hermetically closed, at a temperature between 10°C and 30°C, protected from direct sunlight and in ventilated areas. In these conditions the product has a shelf life of 12 months from the date of the delivery note, if the material will be kept in storage beyond the duration of recommended stability, will not necessarily be considered unusable but must be performed a preventive check on the product.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect use of the product. The indications supplied with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package.

For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing.
