

DETERGON R3

Universal concentrated detergent for cleaning and maintenance of all hard and resilient surfaces

DETERGON R3 is a neutral concentrated product, which has been clinically tested. This product can be used on granite, marble, slate, natural stones, treated terracotta, porcelain stoneware, linoleum, clinker, ceramic, etc.; It is used everywhere namely on door jambs and frames, floors and walls, washable plasticized wall-paper, ceramic tiles, armchairs in skai, motor-car interiors and plastic coatings.

DETERGON R3 is the ideal detergent product for carpets, moquettes, roll-up shutters, venetian blinds, fireplaces, mosquito-nets, bathtubs, sanitary fittings, dish-washers, refrigerators, mirrors, glasses, lighting equipments; **DETERGON R3** is particularly suitable for use with wash-and-dry machines.

Thanks to its very special countless applications and to its powerful antibacterial action, **DETERGON R3** is largely demanded since many years, not only for household use, but it is more and more frequently being applied in hospitals, hotels, industries, etc.

HOW TO USE

Dilution: The dilution ratios change according to the type of dirt to be removed.

Application: To clean treated terracotta apply DETERGON R3 diluting 1 or 2 small measures in 10 litres of water, dip the cloth in the solution and clean the surfaces.

There is no need to rinse if the product has been highly diluted.

To remove marks left by rubber shoes on terracotta floors, use DETERGON R3 undiluted on a wet cloth and rub softly on the black marks to be removed (it is not necessary to insist rubbing on the surface to be cleaned). Black marks or stripes can be easily removed with no risk of spoiling treatment.

For normal cleaning of surfaces like: polished marble and granite, ceramics etc., we suggest to add a small quantity of product to the bucket of water. DETERGON R3 is an ecological product, being almost completely biodegradable. Being a neutral product, it does not spoil wax or water-oil repellent treatments when applied at recommended dilution ratios.

COVERAGE

It is variable according to the type of surface to clean and dirt to remove off.

WARNINGS

The MSDS is available upon request.

PACKAGING

Bottle of 1 kg. Box of 12/24 pcs
Drum of 5 kg. Box of 6 pcs
Tank of 10 kg/25 kg

HANDLING AND STORAGE

The product must be stored in the original containers, perfectly sealer, at a temperature between 0 and 30°C and shielded from direct sunlight. In these conditions, the product has a self-life of 12 months of the date quoted in the delivery note. If the material has been stored for longer than its recommended self-

life, it might still be suitable, but this has to be determined beforehand by performing quality checks on its application-related properties.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect use of the product. The indications supplied with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package.

For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing.
