

GRANISHINE

Polishing powder for granites

APPLICATION

GRANISHINE is a mix of polishing powders and synthetic abrasives, which allows the polishing on wet granites. The polishing treatment is extremely easy. To use on granites, resin conglomerate ecc. **Also available in the GRANISHINE EXTREME version, pigmented in dark grey to enhance color and polishing depth.**

HOW TO USE

The surface has to be cleaned before the beginning of the treatment, in order to remove residues, after that apply from 30 gr to 60 gr (2 or 3 spoons) of product per square meter; wet the powder to get a milky texture, then place the traditional surface equipped with a felt pad, or use a weighting mono-brush machine and work a few meters at time, the surface has always to be wet. A thin layer of the used product remains on the floor; we suggest removing a part (using a cloth) in order to check the grade of finish reached and if is necessary repeat the operation. At the end of the polishing treatment, it is recommended to remove all patina and wash with a neutral detergent such as

DETERGON R3 or with a water-repellent detergent like K-SOAP, in order to obtain a clear surface with excellent temporary resistance to dirt, with clean and protected joints, thus making daily maintenance easier.

WARNINGS

Before any application, do a preliminary test. The MSDS is available upon request.

PACKAGING

Drum of 17 kg

Drum of 5 kg

Pot of 1 kg

HANDLING AND STORAGE

The product must be stored in the original containers, perfectly sealed, at a temperature between 0 and 30°C and shielded from direct sunlight. In these conditions, the product has a self-life of 12 months of the date quoted in the delivery note. If the material has been stored for longer than its recommended self life, it might still be suitable, but this has to be determined beforehand by performing quality checks on its application-related properties.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect

use of the product or inadequate storage. The indications supplied with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package. For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing. The reproduction, even partial of this product sheet is forbidden. The data refer to the standards in force at the time of printing, 2023. The company reserves the right to make any changes without notice.
