

MICROSIL NORMAL

It hides roughness on granite and coloured marble and it enhances the colour

APPLICATIONS

The product **MICROSIL NORMAL** roughness on stone materials, it improves the shine and is suitable for treating coloured marble and granite, enhancing both the quality of the surfaces and their natural colour.

The product **MICROSIL NORMAL** makes the materials treated water repellent, it is easy to apply and it does not leave residual on the surfaces where the product is applied.

It is also possible to add additional colour pigmentations to **MICROSIL NORMAL** thus creating additional colour tones and improving gloss for 7/8 points (the colour pigmentations are supplied on request).

Treatment with the product **MICROSIL NORMAL** has many advantages, such as:

- o Resistance against washing
- o Surface improvement
- o Application of colour tones required and long life of gloss
- o It hides roughness on materials, closing the little cracks on it.

HOW TO USE

1) Manual application on polished and perfectly dry slabs

Apply the product **MICROSIL NORMAL** on slabs placed horizontally, allowing the product to drip onto the surface spreading it evenly with a paper pad; after a few seconds, we suggest uniform the product with a microfibre cloth.

2) Automatic application on polished and perfectly dry slabs

Apply the product **MICROSIL NORMAL** neutral or with colour pigmentations using a waxing machine.

3) Automatic application on smoothed and perfectly dry slabs:

Wet the smoothed surfaces of the slabs with a generous amount of **MICROSIL NORMAL** and let it dry

for 3/4/5 days. Place the slabs on the polishing line starting from the last 2/3 heads.

COVERAGE

Manual application: 35/40 sqm per litre.

Automatic application: 80/100 sqm per litre.

PRECAUTIONS

Use the product on perfectly dry materials.

We advise against using this product on white marble.
