

Neutralize pH

Let's shine

Acidity corrector for surfaces treated
with Acid Color system

CHARACTERISTICS

NEUTRALIZE pH is a water-based solution that is easy to use, formulated to balance the correct level of alkalinity of the concrete, allowing an optimal level of 8-10 pH to be reached after the use of decorative colored acids. The product is normally applied during the washing phase before and after the use of coloring acids, in the realization of acidified floors the use of **NEUTRALIZE pH** allows avoiding unwanted reactions with possible subsequent cycles to be performed with silicate-based products or with protective systems.

HOW TO USE

PREPARATION OF THE PRODUCT: **NEUTRALIZE pH** is ready to use, it is not necessary to dilute it. Shake well before use and keep stirred during the application phases.

APPLICATION: we recommend proceeding by spraying the product with a plastic pump or spreading the product on the floor during the washing phase by releasing the single-disk machine from the tank.

Allow the product to work for at least 10 minutes, then proceed to wash the surface, remove the residues and rinse with water.

INDICATIVE COVERAGE

Not quantifiable.

Neutralize pH

5 kg | 25 kg

Box of 5kg for piece

STORAGE

The product must be stored in the original containers, hermetically closed, at a temperature between 5 °C and 30 °C, protected from direct sunlight and in ventilated areas. In these conditions the product has a shelf life of 12 months from the date of the delivery note, if the material will be kept in storage beyond the duration of recommended stability, will not necessarily be considered unusable but must be performed a preventive check on the product.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect use of the product. The indications supplied with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package. For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing.
