

Safe Step R13

Let's shine

**Solid glass microspheres to be used
as an additive for sealing resins**

CHARACTERISTICS

SAFE STEP R13 are high-quality, highly transparent solid glass spheres with a high degree of roundness and elasticity. With their smooth, homogenous surface and absence of foreign bodies, they guarantee superior performance and increased slip resistance when added to resin systems.

SAFE STEP R13 is an additive that is mixed with sealing resins for flooring to increase slip resistance.

Thanks to its round, glass granules, **SAFE STEP R13** reduces the disadvantages of lighter cleaning of surfaces with anti-slip properties. It does not affect the transparency of the resin, has high impact resistance, affects viscosity, does not absorb the resin, is resistant to UV rays (non yellowing) and has high chemical resistance.

HOW TO USE

PREPARATION OF THE PRODUCT: mix approx. 5-7% of the weight to the relative resin for flooring. Add and fully incorporate the quantity indicated and mix for 1-2 minutes with a mechanical shaker until a homogenous mix is obtained. The resin and microspheres must be fully mixed before use.

APPLICATION: the material must be kept mixed during work and following any interruptions to work to avoid uneven application due to any depositing of microspheres on the bottom. Be sure to add the quantities indicated.

2,5 kg

STORAGE

The product must be stored in the original containers, hermetically closed, at a temperature between 10°C and 30°C, protected from direct sunlight and in ventilated areas. In these conditions the product has a shelf life of 12 months from the date of the delivery note, if the material will be kept in storage beyond the duration of recommended stability, will not necessarily be considered unusable but must be performed a preventive check on the product.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect use of the product. The indications supplied with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package.

For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing.
