

SIRIUS STONE

Special polishing liquid wax for marble, granite, polished or smoothed marble agglomerates

APPLICATIONS

SIRIUS STONE is a special compound in a solvent-based liquid wax dispersing medium, specific for the ground protective polishing, in-depth toning, dressing and maintenance treatment of polished or smoothed surfaces in marble, travertine, granite, marble agglomerates, vanity tops, kitchen counter tops and tables. One or more coats make the surfaces extraordinarily brilliant. **SIRIUS STONE** represents the ideal product both as a fixative (glossy finish) non-filming agent and as waterproofing protective final coating, bringing out the colours of marble and granite. **SIRIUS STONE** can be applied both on its own or on water-repellent or oil-repellent products as well as to maintain marble, granite and natural stone. The treated surfaces acquire a better resistance to water, oil and wine-based stains.

HOW TO USE

SIRIUS STONE should be applied on clean and completely dry surfaces. Spray the product directly onto the floor and spread it carefully and evenly possibly using a single-brush polisher equipped with red or white disk or a short-haired wax spreader. When dry, polish using fine or

extra fine steel wool or a white pad.

COVERAGE

1 litre for 45-50 sq.m. approx.

WARNINGS

Refer to the MSDS available upon request.

PACKAGING

Can of 750 ml. Box of 12/24 pcs

HANDLING AND STORAGE

The product must be stored in the original containers, perfectly sealer, at a temperature between 0 and 30°C and shielded from direct sunlight at ventilated area. In these conditions, the product has a self-life of 12 months of the date quoted in the delivery note. If the material has been stored for longer than its recommended self-life, it might still be suitable, but this has to be determined beforehand by performing quality checks on its application-related properties.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect use of the product or inadequate storage. The indications supplied

with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package.

For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing. The reproduction, even partial of this product sheet is forbidden. The data refer to the standards in force at the time of printing, 2016.

The company reserves the right to make any changes without notice.
