

Zero-oil

Let's shine

Super concentrated alkaline detergent
for concrete surfaces

CHARACTERISTICS

ZERO-OIL is an industrial alkaline biphasic detergent specifically designed for rapid and deep cleaning of industrial concrete surfaces from oily sediment and heavy dirt; thanks to the particular formulation and innovative action of its components this super-concentrated detergent is able to solubilize and to eliminate quickly various types of dirt.

Thanks to a high penetrating, emollient and emulsifying power, **ZERO-OIL** also removes the most tenacious dirt, guaranteeing deeper cleaning. Particularly suitable for all those sectors where a highly aggressive product is required for removal of very difficult soils; **ZERO-OIL** can be used for extraordinary cleaning on various industrial surfaces such as cement and synthetic coatings.

The product can also be used to remove forklift tire marks and for the ordinary cleaning of the polishing floor.

HOW TO USE

PREPARATION OF THE PRODUCT: shake well before use in order to uniform the biphasic compound in a homogeneous solution; **ZERO-OIL** can be used in dilution with water from 3% to 8%. In case it is necessary to remove superficial sludge layers, it can be diluted with water from 1:8 to 1:5, in case of use into floor cleaning machine, we recommended the use of an anti-foam product into the tank.

APPLICATION: prevent the product from drying on the surface and in case of use

on paints, rubbers, layers of resin, check the compatibility with the support for which it is intended. After washing operation it is advisable to rinse with water.

12 kg

STORAGE

The product must be stored in the original containers, hermetically closed at a temperature between 10°C and 30°C, protect from direct sunlight and in ventilated areas. In these conditions the product has a shelf life of 12 months from the date of the delivery note, if the material will be kept in storage beyond the duration of recommended stability, will not necessarily be considered unusable but must be performed a preventive check on the product.

LIMITS OF RESPONSIBILITY

We decline all responsibility for work and damage which might result from improper or incorrect use of the product. The indications supplied with our product specifications and instructions for use are the results of accurate laboratory tests and experience in the field. However, as it is not possible to forward other evidence, when the products are used, these indications shall not be binding and do not imply liability on our part. As well as following good working practices, before applying the product we recommend you read the safety recommendations and the directions on the package.

For the best professional results, it is advised to test a small area first, for compatibility with the surface to treat and the desired effect. This preliminary testing is also useful to determine the consumption according to the characteristics of the material the product will be used for and to the type of processing. The reproduction, even partial of this product sheet is forbidden. The data refer to the standards in force at the time of printing, 2013. The company reserves the right to make any changes without notice.
